

### **What is a Management Team?**

A management team is a group of managers and/or supervisors who have a common Manager. Most of the time management team members will be managers or supervisors that have someone reporting to them for whom they are responsible for doing Performance Planning and Evaluation (PEP). Sometimes management team members will be “program managers” or “advisors” that do not have anyone reporting to them, but are considered part of the management team.

### **What If My Management Team Doesn't Have Enough Members?**

For the purposes of Managing Matters we need to have management teams that have at least eight (8) members. If you have a management team that does not have eight (8) members, you may want to contact us to find out alternative ways to take advantage of Managing Matters.
